

MSc Nursing 2023

Q. No. 1 0012001	Capacity of gall bladder is around
Option A	150 ml
Option B	250 ml
Option C	50 ml
Option D	500 ml
Correct Option	C

Q. No. 2 0012002	The volume of blood that is pumped out by each ventricle at each heart beat is called
Option A	Cardiac output
Option B	Stroke volume
Option C	Cardiac cycle
Option D	Tidal volume
Correct Option	B

Q. No. 3 0012003	Total number of cervical, thoracic and lumbar vertebrae comes to:
Option A	24
Option B	33
Option C	37
Option D	27
Correct Option	A

Q. No. 4 0012004	Muscles of inspiration include all except
Option A	Diaphragm
Option B	External intercostals
Option C	Sternocleidomastoid
Option D	Internal intercostals
Correct Option	D

Q. No. 5 0012005	Gluconeogenesis is decreased by
Option A	Glucagon
Option B	Epinephrine
Option C	Glucocorticoids
Option D	Insulin
Correct Option	D

Q. No. 6 0012006	Benedict's test is less likely to give weakly positive results with concentrated urine due to the action of
Option A	Urea
Option B	Uric acid
Option C	Ammonium salts
Option D	Phosphates
Correct Option	B

Q. No. 7 0012007	Steaming of material at 100°C for 20 minutes for 3 consecutive days is
Option A	Inspissation
Option B	Tyndallisation
Option C	Pasteurisation
Option D	Incineration

Correct Option	B
----------------	----------

Q. No. 8 0012008	Free living microbes that live on dead or decaying organic matter are known as
Option A	Parasites
Option B	Saprophytes
Option C	Commensals
Option D	Pathogens
Correct Option	B

Q. No. 9 0012009	The patients of following blood group have highest tendency of gastric carcinoma
Option A	Blood group A
Option B	Blood group O
Option C	AB blood group
Option D	Blood group B
Correct Option	A

Q. No. 10 0012010	Increased uric acid levels are found in
Option A	Gout
Option B	Wilson disease
Option C	Fanconi syndrome
Option D	Yellow atrophy of liver
Correct Option	A

Q. No. 11 0012011	Observation is the method of
Option A	Assessment
Option B	Planning
Option C	Evaluation
Option D	Data collection
Correct Option	D

Q. No. 12 0012012	Mummy restraints are used in
Option A	Adolescents
Option B	Adults
Option C	Old age patient
Option D	Small children
Correct Option	D

Q. No. 13 0012013	One ml is equivalent to macro drops
Option A	15
Option B	25
Option C	35
Option D	55
Correct Option	A

Q. No. 14 0012014	What position best facilitates this assessment ?
Option A	Sims
Option B	Lithotomy
Option C	Dorsal recumbent
Option D	High fowler's
Correct Option	D

Q. No. 15 0012015	What is the term used for a high-pitched musical sound in clients during a respiratory assessment ?
Option A	Crowing
Option B	Wheezing
Option C	Stridor
Option D	Sigh
Correct Option	B

Q. No. 16 0012016	The interpretation of the data collected about the patient represents the:
Option A	Assessment of the patient
Option B	Health problems of the patient
Option C	Proposed plan of care for the patient
Option D	Nursing interventions done for the patient
Correct Option	A

Q. No. 17 0012017	It refers to the preparation of the bed with a new set of linens:
Option A	Bed bath
Option B	Bed making
Option C	Bed shampoo
Option D	Bed lining
Correct Option	B

Q. No. 18 0012018	Priorities of planning in Nursing process is done by
Option A	Information processing model
Option B	Interpersonal theory
Option C	Stages of illness model
Option D	Maslow's hierarchy of human needs
Correct Option	D

Q. No. 19 0012019	Which of the following is most likely to validate that a client is experiencing intestinal bleeding ?
Option A	Large quantities of fat mixed with pale yellow liquid stool
Option B	Brown formed stool
Option C	Semi soft tar colored stools
Option D	Narrow, pencil shaped stool
Correct Option	C

Q. No. 20 0012020	Kussmaul's respirations is increased respiratory rate, increased depth, panting labored breathing causes in:
Option A	Hypertension
Option B	Diabetic ketoacidosis
Option C	Bronchial asthma
Option D	Pneumonia
Correct Option	B

Q. No. 21 0012021	The pioneer of the modern nursing is
Option A	Adhoka
Option B	Paula
Option C	Florence nightingale
Option D	Marcella
Correct Option	C

Q. No. 22 0012022	Which of the pulse is palpated to see the effectiveness of CPR ?
Option A	Ulnar

Option B	Carotid pulse
Option C	Radial pulse
Option D	Temporal pulse
Correct Option	B

Q. No. 23 0012023	The boiling point of water is
Option A	121°C
Option B	140°C
Option C	200°C
Option D	100°C
Correct Option	D

Q. No. 24 0012024	Which of the following technique involves the sense of sight ?
Option A	Inspection
Option B	Palpation
Option C	Percussion
Option D	Auscultation
Correct Option	A

Q. No. 25 0012025	What percentage of proteins contributes to the total energy in Indian diets ?
Option A	1-5%
Option B	10-15%
Option C	20-25%
Option D	50-65%
Correct Option	B

Q. No. 26 0012026	Examples for the micro nutrients are
Option A	Calcium
Option B	CHO (Carbohydrates)
Option C	Fats
Option D	Nutrients
Correct Option	A

Q. No. 27 0012027	Follicular hyperkeratosis is also called as
Option A	Bitots spots
Option B	Xerosis cornea
Option C	Phrynoderma
Option D	Keratomalacia
Correct Option	C

Q. No. 28 0012028	Deficiency of vitamin D in adult's causes
Option A	Osteomalacia
Option B	Osteoporosis
Option C	Rickets
Option D	Bone deformities
Correct Option	A

Q. No. 29 0012029	Rich sources of vitamin C are
Option A	Amla
Option B	Apple
Option C	Orange

Option D	Spinach
Correct Option	A

Q. No. 30 0012030	After marriage if the wife resides in her husband's house, descent and property is traced through the male line, the system is known as:
Option A	Matriarchal family
Option B	Patriarchal family
Option C	Orientation family
Option D	Extended family
Correct Option	B

Q. No. 31 0012031	Other term for multigenerational family :
Option A	Joint family
Option B	Nuclear family
Option C	Extended family
Option D	Single family
Correct Option	C

Q. No. 32 0012032	In which of the following types of systems is a person's right and rank in the society determined by his birth into a particular group ?
Option A	Estate system
Option B	Meritocracy
Option C	Caste system
Option D	Class system
Correct Option	C

Q. No. 33 0012033	When people change their position in a social hierarchy it is called
Option A	Social justice
Option B	Social structural mobility
Option C	Class system
Option D	Social mobility
Correct Option	D

Q. No. 34 0012034	Which of the following does not influence mental health ?
Option A	Heredity
Option B	Childhood experiences
Option C	Education
Option D	Physical health
Correct Option	C

Q. No. 35 0012035	Excessive worrying, muscle tension, headaches, sweating, tiredness, trembling and nausea may be symptoms of :
Option A	OCD
Option B	Phobia
Option C	Hysteria
Option D	Generalised anxiety disorder
Correct Option	D

Q. No. 36 0012036	Which of the following is not true about the id ?
Option A	It is based on the pleasure principle
Option B	It deals with our conscience
Option C	It is present at birth
Option D	It contains aggressive instinct
Correct Option	B

Q. No. 37 0012037	A rope in a dark room is perceived as a snake. This is an example of :
Option A	Perceptual set
Option B	Hallucination
Option C	Illusion
Option D	Retinal disparity
Correct Option	C

Q. No. 38 0012038	Pharmacodynamics is the study of :
Option A	What the drug does to the body
Option B	What the body does to the drug
Option C	What the body and the drug do to each other
Option D	Absorption of the drug
Correct Option	A

Q. No. 39 0012039	The preferred route of administration in an unconscious patient is :
Option A	Sublingual
Option B	Oral
Option C	Intravenous
Option D	Nasal
Correct Option	C

Q. No. 40 0012040	The following is generally the drug of first choice in typhoid
Option A	Amoxicillin
Option B	Tetracycline
Option C	Erythromycin
Option D	Ciprofloxacin
Correct Option	D

Q. No. 41 0012041	The following is used in roundworm infestation :
Option A	Metronidazole
Option B	Albendazole
Option C	Clotrimazole
Option D	Fluconazole
Correct Option	B

Q. No. 42 0012042	Priority nursing intervention in the immediate post gastroscopy period will be :
Option A	Administer oxygen
Option B	Assess gag reflex prior to administration of fluids
Option C	Administer ordered fluid and drugs
Option D	Replace NG drainage every 2 hourly
Correct Option	B

Q. No. 43 0012043	The most common site of occurring peptic ulcers in stomach:
Option A	Pyloric portion
Option B	Cardiac portion
Option C	Esophageal junction
Option D	Body of the stomach
Correct Option	A

Q. No. 44 0012044	Which type of solution is commonly used for the fluid replacement in burns?
----------------------	--

Option A	Hartmann solution
Option B	Normal saline
Option C	5% dextrose
Option D	5% dextrose in normal saline
Correct Option	A

Q. No. 45 0012045	Nurse Ramya is suctioning a tracheostomy tube of an adult patient. During the procedure, the catheter appears to attach to the tracheal wall and creates a pulling sensation. What is the best action for the nurse to take?
Option A	Continue suctioning until the obstruction removed
Option B	Increase the pressure of suction
Option C	Insert the tube deeper and apply more pressure
Option D	Release the suction by opening the vent
Correct Option	D

Q. No. 46 0012046	Which of the following respiratory complication is most common after surgery?
Option A	Pulmonary embolism
Option B	Empyema
Option C	Atelectasis
Option D	Pulmonary edema
Correct Option	C

Q. No. 47 0012047	Any disturbance that blocks the transmission of nerve impulse from SA node downwards is known as :
Option A	Heart block
Option B	Heart attack
Option C	Nerve block
Option D	Nerve block cardiac arrhythmias
Correct Option	A

Q. No. 48 0012048	Which among the following is the most specific marker for the diagnosis of acute myocardial infarction ?
Option A	Troponin
Option B	Creatinine kinase
Option C	LDH
Option D	Myoglobin
Correct Option	A

Q. No. 49 0012049	Blood group which is not likely to be present in a baby born to mother with O positive and father with A negative blood group
Option A	A positive
Option B	A negative
Option C	O positive
Option D	AB positive
Correct Option	D

Q. No. 50 0012050	Immediate management of choice to restore B.P. and peripheral circulation is:
Option A	Trendelenburg position
Option B	Ringer lactate
Option C	Colloids
Option D	Inotropes
Correct Option	B

Q. No. 51 0012051	Glasgow coma scale has all, except:
Option A	Verbal response
Option B	Motor response

Option C	Sensory response
Option D	Eye opening
Correct Option	C

Q. No. 52 0012052	Parkinsons's disease is caused by:
Option A	Degeneration of substantia nigra depleting dopamine production
Option B	Ischemic in the brain stem producing motor disorder
Option C	A post-viral illness causing ascending paresthesia
Option D	An autoimmune disorders that destroy acetylcholine receptors
Correct Option	A

Q. No. 53 0012053	What is the first thing a nurse should assess to determine the presence of neurological changes?
Option A	Vital signs
Option B	Mental status
Option C	Reflexes
Option D	Level of consciousness
Correct Option	D

Q. No. 54 0012054	The most common complication after acute myocardial infarction is :
Option A	Cardiac tamponade
Option B	Cardiac failure
Option C	Pulmonary embolism
Option D	Dysrhythmias
Correct Option	D

Q. No. 55 0012055	When the patient is on mechanical ventilation which of the following equipment should be kept ready at bedside ?
Option A	Water seal chest drainage
Option B	Manual resuscitation bag
Option C	Oxygen analyser
Option D	Tracheostomy cleaning kit
Correct Option	B

Q. No. 56 0012056	Which of the following nursing actions is most essential for a patient with an endotracheal (ET) tube?
Option A	Monitoring proper placement of the tube every 2 hours
Option B	Suctioning endotracheal tube every 1 hour
Option C	Monitoring arterial blood gas every 4 hours
Option D	Provide frequent oral care
Correct Option	A

Q. No. 57 0012057	The nurse understands that the patient diagnosed with pulmonary embolism will be treated by
Option A	Streptokinase
Option B	Tissue plasminogen activator
Option C	IV heparin sodium
Option D	Sodium warfarin
Correct Option	C

Q. No. 58 0012058	The most common cause of acute appendicitis is :
Option A	A fecalith
Option B	Kinking of appendix
Option C	Tumor in the cecum
Option D	External occlusion of the bowel by adhesions

Correct Option	A
----------------	----------

Q. No. 59 0012059	The nurse understands that urine flows through a Foley's catheter by the principle of
Option A	Higher pressure to lower pressure
Option B	Gravity
Option C	Suction
Option D	Siphoning
Correct Option	B

Q. No. 60 0012060	Which of the following does not support the vagina ?
Option A	Perineal body
Option B	Levator ani muscle
Option C	Broad ligament
Option D	Cardinal ligament
Correct Option	C

Q. No. 61 0012061	Softening of the lower uterine segment just above the cervix is called
Option A	Hegar's sign
Option B	Chadwik's sign
Option C	Osiander's sign
Option D	Palmar's sign
Correct Option	A

Q. No. 62 0012062	What is the characteristic violet discolouration of the vagina during pregnancy called
Option A	Hegar's sign
Option B	Chadwik's sign
Option C	Osiander's sign
Option D	Palmar's sign
Correct Option	B

Q. No. 63 0012063	What is the total weight gain during pregnancy?
Option A	5kg
Option B	8kg
Option C	10kg
Option D	12.5kg
Correct Option	D

Q. No. 64 0012064	Following delivery , the uterus becomes a pelvic organ at
Option A	24 hours post - delivery
Option B	48 hours post - delivery
Option C	1 week post - delivery
Option D	2 weeks post - delivery
Correct Option	D

Q. No. 65 0012065	Which of the following does not cause the subinvolution of the uterus ?
Option A	Retained Placental fragments
Option B	Pelvic infection
Option C	Anemia
Option D	Complete perineal tear
Correct Option	D

Q. No. 66 0012066	A 25 - year old primigravida presents at 8 weeks of gestation with hyperemesis. Which of these is not included in the triad of hyperemesis ?
Option A	Dehydration
Option B	Weight loss
Option C	Ketosis
Option D	Increased appetite
Correct Option	D

Q. No. 67 0012067	According to ICMR, severe anemia in pregnancy is defined as hemoglobin below what value
Option A	11 g/dL
Option B	10 g/dL
Option C	7 g/dL
Option D	4 g/dL
Correct Option	C

Q. No. 68 0012068	What is the average requirement of iron in the third trimester ?
Option A	2-4 mg/day
Option B	4-6 mg/day
Option C	6-8 mg/day
Option D	8-10 mg/day
Correct Option	C

Q. No. 69 0012069	Under the National Anemia Prophylaxis Programme, how much elemental iron should all pregnant and lactating mothers receive?
Option A	50 mg of elemental iron
Option B	80 mg of elemental iron
Option C	100 mg of elemental iron
Option D	150 mg of elemental iron
Correct Option	C

Q. No. 70 0012070	Which of the following is not one of the danger signs of pre-eclampsia?
Option A	Persistent headache
Option B	Vision disturbance
Option C	Pain abdomen
Option D	Pulmonary edema
Correct Option	C

Q. No. 71 0012071	What is the target postprandial blood glucose in the control of GDM pregnancy?
Option A	< 100 mg /dL
Option B	110 - 120 mg/dL
Option C	120-140 mg / dL
Option D	140-200 mg/dL
Correct Option	B

Q. No. 72 0012072	Autism can usually be diagnosed when the child is about
Option A	1 month
Option B	2 month
Option C	2 years
Option D	14 years
Correct Option	C

Q. No. 73 0012073	A foul smelling frothy stool in cystic fibrosis result from the presence of large amount of
Option A	Phenylalanine

Option B	Undigested fat
Option C	Undigested CHO
Option D	Undigested protein
Correct Option	B

Q. No. 74 0012074	Child survival and safe motherhood programme was introduced by
Option A	World Health Organization (WHO)
Option B	Ministry of Health (MOH)
Option C	Indian Academy of Pediatrics (IAP)
Option D	National Neonatology Forum (NNF)
Correct Option	D

Q. No. 75 0012075	The average increase of head circumference from birth to 6 months is
Option A	0.5 cm / month
Option B	1 cm / month
Option C	1.5 cm / month
Option D	2 cm / month
Correct Option	B

Q. No. 76 0012076	The nurse is employed in well baby clinic to administer vaccines. Which of the following is present is a contraindication for receiving immunization?
Option A	Vomiting
Option B	Excessive crying
Option C	Diarrhea
Option D	Fever
Correct Option	D

Q. No. 77 0012077	When do you called child as a premature
Option A	When the birth weight is 3.5 kg
Option B	4 kgs birth weight
Option C	3 kgs of birth weight
Option D	2.5 kg of birth weight or less than
Correct Option	D

Q. No. 78 0012078	Number of deciduous teeth is
Option A	20
Option B	24
Option C	28
Option D	32
Correct Option	D

Q. No. 79 0012079	The bone most frequently fractured during delivery is
Option A	Radius
Option B	Clavicle
Option C	Humerus
Option D	Ulna
Correct Option	C

Q. No. 80 0012080	The dietary changes that a nurse would implement with a 2 year child who is in the acute stage of Nephrotic syndrome is :
Option A	Increased iron intake
Option B	Decreased fat intake
Option C	Decreased sodium intake

Option D	Increased protein intake
Correct Option	C

Q. No. 81 0012081	Addison's disease is otherwise called as
Option A	Acute adrenocortical insufficiency
Option B	Hyperpituitarism
Option C	Chronic adrenocortical insufficiency
Option D	Hyperaldosteronism
Correct Option	C

Q. No. 82 0012082	ECT is not indicated in
Option A	Catatonic schizophrenia
Option B	Acute depression
Option C	Obsessive compulsive neurosis
Option D	Acute mania
Correct Option	C

Q. No. 83 0012083	Attention deficiency disorder is seen with which of the following drug
Option A	Phenobarbitone
Option B	Amphetamine
Option C	Low dose benzodiazepine
Option D	Cocaine
Correct Option	A

Q. No. 84 0012084	Post traumatic stress disorder is because of
Option A	Vascular accident
Option B	Major life threatening events
Option C	Minor stress
Option D	Head injury
Correct Option	B

Q. No. 85 0012085	Which assessment information would be evaluated as objective data?
Option A	Clinical institute withdrawal assessment (CIWA) score of 10
Option B	Client's statements of generalized anxiety
Option C	Complaints of anorexia
Option D	Client states, "I can't keep my thoughts together"
Correct Option	A

Q. No. 86 0012086	A client diagnosed with major depressive disorder and experiencing suicidal ideation is showing signs of anxiety. Alprazolam (Xanax) is prescribed. Which assessment should be prioritized
Option A	Monitor for signs and symptoms of physical and psychological withdrawal

Correct Option	A

Q. No. 90 0012090	When helping a very confused, elderly client, the best approach is to provide an environment with
Option A	A specific routine
Option B	Group involvement
Option C	A trusting relationship
Option D	Activities that are varied
Correct Option	C

Q. No. 91 0012091	A person with an antisocial personality disorder has difficulty relating to others. Because the person has never learned to
Option A	Count on others
Option B	Empathize with others
Option C	Be dependent on others
Option D	Communicate with other socially
Correct Option	B

Q. No. 92 0012092	Experimental epidemiology deals with
Option A	Epidemics
Option B	Intervention or modification
Option C	Screening of disease
Option D	Early diagnosis
Correct Option	B

Q. No. 93 0012093	Current concept of health promotion and the related activities lead to:
Option A	Better treatment of a problem
Option B	Critical awareness and life style changes
Option C	Adoption of prophylactic services
Option D	Better health services usages
Correct Option	B

Q. No. 94 0012094	Administration of oral polio vaccine to the children is a measure of:
Option A	Health promotion
Option B	Specific protection
Option C	Treatment
Option D	Rehabilitation
Correct Option	B

Q. No. 95 0012095	The system of medicine which is originated from Tamil Nadu State is:
----------------------	---

Option A	Ayurveda
Option B	Siddha
Option C	Homeopathy
Option D	Unani-Tibb
Correct Option	B

Q. No. 96 0012096	Health is a state where every cell and every organ is functioning at optimum capacity. The definition of health is given under the following dimension of health:
Option A	Biological dimension
Option B	Physical dimension
Option C	Physiological dimension
Option D	Vocational dimension
Correct Option	B

Q. No. 97 0012097	The continuous scrutiny of all aspects of occurrence and spread of disease that are pertinent to effective control is known as
Option A	Quarantine
Option B	Screening
Option C	Surveillance
Option D	Monitoring
Correct Option	C

Q. No. 98 0012098	The establishment of 'green belts' in the prevention and control of air pollution is a method of:
Option A	Containment
Option B	Replacement
Option C	Legislation
Option D	Dilution
Correct Option	D

Q. No. 99 0012099	Herd immunity does not protect an individual in
Option A	Diphtheria
Option B	Poliomyelitis
Option C	Smallpox
Option D	Tetanus
Correct Option	D

Q. No. 100 0012100	The most effective sterilizing procedure is
Option A	Sunlight
Option B	Boiling
Option C	Hot air oven
Option D	Radiation
Correct Option	D

Q. No. 101 0012101	Possessing the abilities and resources to accomplish family development task is known as
Option A	Family health
Option B	Family development
Option C	Group function
Option D	Community health
Correct Option	A

Q. No. 102 0012102	Incubation period of pertussis is:
Option A	7-14 days
Option B	Less than 2 weeks

Option C	16-28 days
Option D	6 weeks
Correct Option	A

Q. No. 103 0012103	Which of the following is most powerful chemical disinfectant ?
Option A	Phenol
Option B	Lysol
Option C	Dettol
Option D	Potassium permanganate
Correct Option	B

Q. No. 104 0012104	Administration of national health programmes is the responsibility of :
Option A	Union Health Ministry
Option B	Directorate General of Health Services
Option C	Central Council of Health
Option D	Ministry of Communicable Diseases
Correct Option	B

Q. No. 105 0012105	The concept of primary health centre was first given by :
Option A	Bhore committee
Option B	Mudaliar committee
Option C	Chadha committee
Option D	Shrivastav committee
Correct Option	A

Q. No. 106 0012106	The planned educational experiences provided in a job setting is :
Option A	Curricular education
Option B	In service education
Option C	Primary education
Option D	Specialized education
Correct Option	B

Q. No. 107 0012107	An important aspect of nurses patient relationship is
Option A	Therapeutic
Option B	Personal
Option C	Social
Option D	Causal
Correct Option	A

Q. No. 108 0012108	Johari window facilitates understanding of
Option A	One's own strengths and limitation
Option B	Implementation of nursing process
Option C	Learning theories
Option D	Feedback mechanism
Correct Option	A

Q. No. 109 0012109	Checklist and rating scales as tools of counselling are
Option A	Testing tools
Option B	Non testing tools
Option C	Standardized tools
Option D	Personality tools

Correct Option	B
----------------	----------

Q. No. 110 0012110	Naturalism philosophy emphasizes
Option A	Rigid discipline to child
Option B	Free discipline to child in nature
Option C	Spontaneous and self discipline to child in nature
Option D	No discipline to child in nature
Correct Option	B

Q. No. 111 0012111	Professional organization is an example of :
Option A	Active agency
Option B	Passive agency
Option C	Formal agency
Option D	Nonformal agency
Correct Option	A

Q. No. 112 0012112	Henry Fayol suggested the following principles of management except
Option A	Division of work
Option B	Authority and responsibility
Option C	Scalar chain
Option D	Principle of time and motion
Correct Option	D

Q. No. 113 0012113	The process of assignment of activities and laying down of line and staff relationship is called
Option A	Staffing
Option B	Organizing
Option C	Planning
