

## SCIENCE

Are you afraid of science fiction as they portray imaginary characters from another world or take you to your past or future or to a remote corner of the world. Its time to explore these possibilities by reaching the centre of the earth through reading the book " Journey to the centre of the earth" by Jules Verne.

Based on your reading answer the following questions in A-4 sheets. Use your imagination and creativity to do the work and have fun.

1.

Name and describe the devices they carried along with them and also write their uses. Draw or paste their pictures.

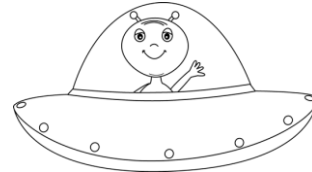

Journey to the  
Centre of the Earth  
by Jules Verne

2.

You have come across many different species of plants and animals in the book. Write about any four of them and draw their figures on the basis of the description given in the book.

3.

Write about scientific observations that you can relate to real life and are not created. You can draw or paste pictures.

4. Find the scientific terms used in the book and write their meanings in the graphic organizer.
