Lesson - 1 Globe – A model of the earth Worksheet

I . Name the seven continents and five oceans.

CONTINENTS

OCEANS

Ans. _____

II. Fill in the blanks

1. An imaginary line that divides the earth into two equal halves is called _____.
2. The portion of the earth above the equator is called _____.
3. Lines of Longitude are also called as _____.
4. There are _____ number of latitudes drawn on the globe.
5. The starting line to number the meridians is the _____.

III. True or False.

1. All the longitudes are of equal length. ()
2. Lines of latitude are also called as meridians. ()
3. The north pole is marked as 90 S. ()
4. Equator is taken as the starting line to number the parallels. ()
5. All Parallels are equal in length. ()

IV. **Give reason.**

1. The shape of the earth is like an orange.

Ans.

2. The parallels are not equal in length.

Ans.

V. **Choose the correct option.**

1. Total number of longitudes drawn on the globe

- A) 180 b) 340 c) 360

2. The longest 0 latitude is

- a) Equator b) Prime meridian c) north pole

3. At $23\frac{1}{2}$ S lies the

- a) Tropic of cancer b) Arctic circle c) Tropic of Capricorn

4. At $66\frac{1}{2}$ N lies the

- a) South pole b) Arctic circle c) Antarctic circle

VI. **Using the atlas, Find the latitudes and longitudes between which Saudi Arabia and India lies.**

| <u>Country</u> | <u>Latitude</u> | <u>Longitude</u> |
|----------------|-----------------|------------------|
| Saudi Arabia | _____ | _____ |
| India | _____ | _____ |

VII. **Using the atlas, Name the states in India through which Tropic of Cancer passes.**
