Constructions

Key Points

1. Construction should be neat and clean and there should be no donbling.
2. Construction should be as per a given scale factor which may be less than 1 or greater than 1 for a triangle similar to a given triangle.
3. Step of construction should be provided only when it is mentioned in the question.
4. We makes use of compass and ruler only but in case of non-standard angles, protractor can be used.
