**(F) What is the importance of marketing from farmers 'point of view'?**

**Answer:**

Marketing involves price of a commodity, its sales promotion, its advertising and its proper distribution.

- In the traditional marketing system, the farmers used to sell their products in the local market at whatever price available. This is because the fruits and vegetables are perishable, so the farmers used to incur losses,
- However, the modern farmers have acquired skills in marketing. They are aware of the trends in the market.
- They produce food grains and fruits as per the international standards.
- They undertake grading and packaging of their products. The presentation of any product has become indispensable now.
- They advertise the quality of their product and keep the same for sale, along with samples, in the mall.
- These commercial-minded farmers contact the supermarkets and exporters through the internet.
- As a result, their products are sold at a higher price in the malls. They also fetch a good price from exports.
- Thus marketing is as important as the cultivation of crops. By following modern marketing techniques, the income of the farmers can increase and that can improve their standard of living.

**Can you tell?**

With a lot of hard work Dhondiba used to grow best varieties of vegetables and other agricultural commodities. But his products could not fetch a good price. His college-going son,

<https://www.indcareer.com/schools/maharashtra-board-solutions-for-class-9-geography-chapter-9-trade/>

saw this situation and he first packed the commodities nicely after cleaning them neatly. Then he contacted the supermarket in the town. Looking at the quality of his product, they advertised the farm product and kept it for sale in the mall. Today, Dhondiba's commodities are being sold for higher prices than before.

**Question 1.**

**Why did Dhondiba's commodities start getting higher prices?**

**Answer:**

For any commodity to be accepted in the market and fetch a better price, it should have an appropriate presentation. The price of the commodity is determined by its quality, its grading and how it is presented before the customer. Dhondiba's son who was educated, realized this and took the necessary actions in time which helped Dhondiba to fetch better price.

**Question 2.**

**What did Dhondiba's son do for that?**

**Answer:**

Dhondiba's college-going son realised that the agricultural commodities sold by his father lacked proper presentation and marketing. So he adopted modern marketing practices like cleaned the commodities well and packed them nicely. He then got in touch with the supermarket in the town. The supermarket was impressed with the quality of Dhondiba's products, they advertised the farm product and kept it for sale in the mall. Dhondiba's commodities were in great demand and sold at higher prices than before.

**Question 3.**

**What measures would you suggest to the farmers near you so that their commodities can fetch a good price?**

**Answer:**

Some of the measures that we can suggest to the farmers so that their commodities can fetch a better price are:

- Clean their vegetables, fruits well.
- Grade the commodities.
- Pack them nicely.

<https://www.indcareer.com/schools/maharashtra-board-solutions-for-class-9-geography-chapter-9-trade/>

- Advertise their farm products.
- Sell it in the market.

**Give it a try.**

**Obtain information regarding the bilateral trade between India and Japan for any financial year and the value of the export and import of major goods. Write two paragraphs on it.**

**Answer:**

India's Trade with Japan (April 2016-Jan 2017)

|               |             |
|---------------|-------------|
| Exports       | ₹ 20,000 Cr |
| Imports       | ₹ 55,000 Cr |
| Trade Balance | ₹ 35,000 Cr |

This shows that India has an Unfavourable Balance of Trade with Japan, in which the value of Imports is more than the value of Exports.

India's major exports to Japan

Petroleum products, Iron ore, Fish Meat (including lobsters, crabs, shrimps etc) Motor parts, Insecticides, Fungicides, Turbo-jets, Gas turbines etc.

India's major imports from Japan

Iron and Steel Products, Transport Equipments, Plastic, Machinery items like Drilling Platforms, Floating Cranes, Printing machinery etc.

**Think about it.**

**Question 1.**

**What will happen if there is only one currency used in the whole world?**

**Answer:**

The European Union is an example, which has one common currency 'Euro'.

<https://www.indcareer.com/schools/maharashtra-board-solutions-for-class-9-geography-chapter-9-trade/>

Advantages of having one common currency. If the whole world has one common currency, international trade will become much easier and move will increase international trade also.  
Disadvantages of having one common currency.

If all the countries adopt one common currency, there will be one uniform policy. No country will be able to have their own monetary and fiscal policy.

## About About Maharashtra State Board (MSBSHSE)

The Maharashtra State Board of Secondary and Higher Secondary Education or MSBSHSE (Marathi: महाराष्ट्र राज्य माध्यमिक आणि उच्च माध्यमिक शिक्षण मंडळ), is an **autonomous and statutory body established in 1965**. The board was amended in the year 1977 under the provisions of the Maharashtra Act No. 41 of 1965.

The Maharashtra State Board of Secondary & Higher Secondary Education (MSBSHSE), Pune is an independent body of the Maharashtra Government. There are more than 1.4 million students that appear in the examination every year. The Maha State Board conducts the board examination twice a year. This board conducts the examination for SSC and HSC.

The Maharashtra government established the Maharashtra State Bureau of Textbook Production and Curriculum Research, also commonly referred to as Ebalbharati, in 1967 to take up the responsibility of providing quality textbooks to students from all classes studying under the Maharashtra State Board. MSBHSE prepares and updates the curriculum to provide holistic development for students. It is designed to tackle the difficulty in understanding the concepts with simple language with simple illustrations. Every year around 10 lakh students are enrolled in schools that are affiliated with the Maharashtra State Board.
