The Salient Features of the Choice Based Credit System (CBCS) (Semester Scheme)

Each course in a programme shall carry a certain number of credits, which normally represent the weightage of a course and are a function of teaching, learning and evaluation strategies such as number of contact hours, the course content, teaching methodology, learning expectations, etc. In the proposed programmes, the credits shall be based on the number of instructional hours per week, generally 1 credit is equivalent to one hour of instruction in theory, or 1 or 2 hours of tutorial, or one and a half or two hours of practical/field work/project work/internship per week.

The other features of the CBCS (Semester Scheme) are:

- a) The P. G. Degree Programmes are structured on Credit Based Semester Scheme.
- b) The relative importance of subjects of study and activities are quantified in terms of credits. Total credit of the programme is between 84 to 92.
- c) Each programme of study will have “Core” and “Elective” courses. The Core course will further consist of “Hard” and “Soft” core courses. Hard core courses will have 3-5 credits while soft core courses will have 3-4 credits.
- d) Two or more Open Elective courses of 3 credits (Except programmes under Management discipline) each shall be offered in the II and III semesters by every Department. Open elective will be chosen from an unrelated programme within the faculty or across the faculty.
- e) The declaration of result is based on the Grade Point Average (GPA) earned towards the end of each semester and the Cumulative Grade Point Average (CGPA) earned towards the end of the programme with corresponding alpha sign grade.
