(ii) $g(x) = 3 \sin(x - \pi/4)$, $0 \leq x \leq 5\pi/4$

We know that if $f(x)$ is a periodic function with period T , then $f(ax + b)$ is periodic with period $T/|a|$.

So, $g(x) = 3 \sin(x - \pi/4)$ is a periodic function with period π . So, we will draw the graph of $g(x) = 3 \sin(x - \pi/4)$ in the interval $[0, 5\pi/4]$. The values of $g(x) = 3 \sin(x - \pi/4)$ at various points in $[0, 5\pi/4]$ are listed in the following table:

4. $f(x) = 2 \sec \pi x$

Solution:

We know that $f(x) = \sec x$ is a periodic function with period π .

So, $f(x) = 2 \sec(\pi x)$ is a periodic function with period 1. So, we will draw the graph of $f(x) = 2 \sec(\pi x)$ in the interval $[0, 1]$. The values of $f(x) = 2 \sec(\pi x)$ at various points in $[0, 1]$ are listed in the following table:

x	0	1/2	-1/2	1	-3/2	3/2	2
$f(x) = 2 \sec(\pi x)$	2	∞	$\rightarrow -\infty$	-2	$-\infty$	∞	2

5. $f(x) = \tan^2 x$

Solution:

We know that $f(x) = \tan x$ is a periodic function with period π .

So, $f(x) = \tan^2(x)$ is a periodic function with period π . So, we will draw the graph of $f(x) = \tan^2(x)$ in the interval $[0, \pi]$. The values of $f(x) = \tan^2(x)$ at various points in $[0, \pi]$ are listed in the following table:

About RD Sharma

RD Sharma isn't the kind of author you'd bump into at lit fests. But his bestselling books have helped many CBSE students lose their dread of maths. Sunday Times profiles the tutor turned internet star

He dreams of algorithms that would give most people nightmares. And, spends every waking hour thinking of ways to explain concepts like 'series solution of linear differential equations'. Meet Dr Ravi Dutt Sharma — mathematics teacher and author of 25 reference books — whose name evokes as much awe as the subject he teaches. And though students have used his thick tomes for the last 31 years to ace the dreaded maths exam, it's only recently that a spoof video turned the tutor into a YouTube star.

R D Sharma had a good laugh but said he shared little with his on-screen persona except for the love for maths. "I like to spend all my time thinking and writing about maths problems. I find it relaxing," he says. When he is not writing books explaining mathematical concepts for classes 6 to 12 and engineering students, Sharma is busy dispensing his duty as vice-principal and head of department of science and humanities at Delhi government's Guru Nanak Dev Institute of Technology.
